OLX application test report

1. **Report author:** Justyna Jaworska
2. **Date:** 21.12.2021
3. **Introduction**
   - **Purpose of dokument**

   The purpose of the document is to describe the activities performed as part of the OLX application tests
   - **General description of the application**

   OLX is an application used to list free local ads. Using it you can browse, add ads, search for jobs or local services.
   - **Scope of document**

   Description and evaluation of testing activities performed, along with the scope of testing performed.

4. **Test environment:** Phone Samsung Galaxy S7, system Android 8.0.0

5. **Summary of actions performed**

   The scope of the tests covers the functionalities of the OLX application.
   - **Duration of the tests:** 4.5h
   - **Types of manual tests performed:**
     - <u>usability tests</u> - verification that the fonts used in the application are clear, legible, and of an appropriate size, verification of application navigation, whether it is intuitive, easily accessible, verification of the speed of reaction to user actions, whether it is fast enough or meets the user's expectations
     - <u>user interface testing</u> - verification of horizontal and vertical orientation
     - <u>exploratory testing</u> of the entire application
     - <u>functional testing</u>
   - **Application test areas:**

Test area	Test time
The entire application	2h
Login and registration form	0.5h
The function of adding advertisements	0.5h
Search	0.5h
"I'm looking for a job" section	1h
Summary	4.5h

6. Summary of all defects

ID.1.

Summary	When changing the screen orientation from portrait to landscape or vice versa, the list goes back to the top
Priority	Minor
Steps to reproduce	1. Start the application 2. Choose any category 3. Scroll down a few adverts 4. Change the orientation of the phone from portrait to landscape (or vice versa)
Actual results	The search results are shown at the top of the page
Expected result	The same results should appear regardless of the orientation of the phone
Attachments	

ID.2.

Summary	In the I'm looking for a job, My applications tab, you cannot scroll the page
Priority	Minor
Steps to reproduce	1. Launch the applications 2. Go to the Account tab 3. In the I am looking for a job menu, go to My Applications
Actual results	It is not possible to scroll the page
Expected result	We should be able to scroll the page and check what's below
Attachments	

ID.3.

Summary	Malfunction of watch option, heart symbol
Priority	Minor
Steps to reproduce	1. Start the application 2. Choose any category 3. Click on the heart symbol next to the search bar, it becomes highlighted 4. Click on the heart symbol again and it will uncheck 5. Click on the heart symbol again
Actual results	After each subsequent click on the heart symbol, it is unchecked, and yet the following message appears: We will let you know when something new appears
Expected result	The heart should be highlighted, which means you are adding an announcement to the watched

7. Recommendation and evaluation of the tested application

The application works without major complaints. It is legible, simple in navigation and user friendly. Clear colors are used and appropriate contrasts. They also appear minor defects that require repair.
